CONTENTS OF VOLUME 23

NUMBER 1

Structural approach for the identification of power network dynamic equivalents
M. Brucoli, R. Sbrizzai, F. Torelli and M. Trovato 1
Expert system for real-time control of an ironmaking reactor
C.-L. Chen, C.-T. Hsieh and Y.-C. Chao 17
Global stability of a class of linear systems with constrained controls
C. Burgat and S. Tarbouriech 37
Singular perturbation analysis of discrete cheap control problems
S. Sen and K. B. Datta 57
Forward-pass Bryson–Frazier smoother in discrete-time systems
Keigo Watanabe 71
Generalized predictive optimal control: an introduction to the advantages and limitations
M. J. Grimble 85
Eigenstructure assignment for descriptor systems via state variable feedback
C. Georgiou and N. J. Krikelis 99
Design of an atomized organization structure: a graph-theoretic approach
E. Szczerbicki 109
Estimating optimal parameters for parallel database hardware
M. C. Cooper 119
Refining the diffusion approximation for *M/G/m* queueing systems with group arrivals
Jung-Shyr Wu and Jyh-Yeong Wang 127
Comparison of reliability characteristics of two (double component) systems with bivariate exponential lifetimes
L. R. Goel and P. Shrivastava 135
Weighted multi-model control
A. Badr, Z. Binder and D. Rey 145

NUMBER 2

Analysis of a continuously variable pulse-width modulated system via Walsh functions
A. Deb and A. K. Datta 151
Geometric characterization of singular differential algebraic equations
A. Szatkowski 167
Modified recursive least-squares algorithm for parameter identification
Yen-Ming Chen and Yung-Chun Wu 187
Measurement of target motion in image sequence
Yung-Tsan Lin and Shu-Min Chiang 207
Optimal control of dynamic routing in networks with randomly perturbed flows
Y. Yavin and C. Frangos 221
Robust stability of polynomial families and robust strict positive realness of rational function families
Long Wang and Lin Huang 235
Bidiagonal realization for multivariable systems
F. Blanchini and M. Policastro 249
Two-level stochastic control with periodic coordination for a resource allocation problem
Z. Duda and R. Gessing 263

Integrated production-inventory model for multi-products on a single facility
DUG HEE MOON and HARK HWANG 273
Parameter estimation algorithms for bilinear and non-linear systems using Walsh functions—recursive approach
A. N. JHA, A. S. SAXENA and V. S. RAJAMANI 283
Synthesis of optimal control systems for non-minimum phase plants
YA. Z. TSYPKIN 291

NUMBER 3

Medium range forecasting of monthly energy demand via Walsh transform
T. K. BHATTACHARYA and T. K. BASU 297
Stable fraction approach and attitude control of a spinning satellite using a gyrotorquer
P. K. DE and A. IYER 311
Topological approach for abstract systems
TOSHITAMI NISHIKAWA and YASUHIKO TAKAHARA 329
Vehicle antilock braking and traction control: a theoretical study
HAN-SHUE TAN and YUEN-KWOK CHIN 351
Profit evaluation of a two unit cold standby system with random change in units
L. R. GOEL, R. K. AGNIHOTRI and R. GUPTA 367
Two unit cold standby system with correlated failures and repairs
L. R. GOEL, P. SHRIVASTAVA and R. GUPTA 379
Performance analysis of window flow controlled queueing networks with acknowledgment delay
JUNG-SHYR WU and SHU-FUNG YANG 393
Solution of the singularly perturbed matrix difference Riccati equation
XUEMIN SHEN 403
Stabilization of uncertain linear systems via observer based state feedback
K. H. KIENITZ 411
Algorithm for the identification of linear multivariable time-invariant systems from samples of input–output data
G. J. LASTMAN and N. K. SINHA 419
Decentralized stabilization of large-scale systems with structured uncertainties
SHINN-JANG HO, ING-RONG HORNG and JYH-HORNG CHOU 425
Asymptotic observers for non-linear systems
A. TORNAMBÈ 435
Optimal design of majority redundant systems
HOANG PHAM 443
Optimal number of components for a parallel system with competing failure modes
HOANG PHAM 449

NUMBER 4

Monopolistic peak load pricing when demand is dynamic
M. RAUSCHER and F. WIRL 457
Pole assignment problem of a distributed parameter system with unbounded feedback
TOSHIHIRO KOBAYASHI 473
Variance formulae for feedback stochastic control systems
KY MINH VU 489

Analysis of discrete variable structure systems with pseudo-sliding modes
XINGHUO YU and R. B. POTTS 503
State estimation for a class of singular systems
M. DAROUACH and M. ZASADZINSKI 517
Simplification of physical system theory in the modelling of manufacturing, organizational and other socio-economic systems
SUSHIL 531
Algorithm for reducing the minimal realization problem of two-dimensional systems to a system of bilinear equations
G. E. ANTONIOU and P. N. PARASKEVOPOULOS 545
Robust, exponentially fast state estimator for some non-linear stochastic systems
E. YAZ 557
Design of delayed control systems using a simple frequency-domain criterion
HAN-WEN HSU and WEN-LIANG CHEN 569
Design of minimal-order state observers for time-varying multivariable systems
WENJIAN CHAI and N. K. LOH 581
Simulation applied to the approximation of two-dimensional digital filters
W. CONLEY 593
An expert system for detection, localization and correction of faults in a multi-loop launch vehicle guidance and control system
R. DORAISWAMI and S. DASGUPTA 605
Further results on the stabilization of time delay systems containing saturating actuators
E. TISSIR and A. HMAMED 615
Non-linear analysis of a linear–non-linear–linear system
KATSUMI YOSHINE and NAOHIRO ISHII 623
Scheduling ship discharging via knowledge transformed heuristic evaluation function
CHIANG KAO, CHIHSEN WU, DER-CHIANG LI and CHIH-YAN LAI 631
Reliability evaluation of a shut down system. Part 1: Component models
M. ALAM 641
Reliability evaluation of a shut down system. Part 2: System model
M. ALAM 649
Determining economic maintenance frequency of a transport fleet
S. K. GOYAL and A. GUNASEKARAN 655
Correspondence
Counter-example to 'Perturbation bounds for root-clustering of linear continuous-time systems'
R. K. YEDAVALLI 661

NUMBER 5

Infinite-dimensional Carleman linearization, the Lie series and optimal control of non-linear partial differential equations
S. P. BANKS 663
Explicit representations of Lyapunov functions for stable analytic systems
S. P. BANKS 677
Disturbance decoupling via dynamic feedback
LI CAO and YU-FAN ZHENG 683
Extended LQG self-tuning controller in a mixed background
BORE-KUEN LEE and YU-PING LIN 695

Multilevel aggregation of central server models: a minimum relative entropy approach
D. D. KOUVATSOS and P. J. TOMARAS 713
Combined modal and singular perturbation approach to decentralized control
M. ALDEEN and H. TRINH 741
Robust eigenstructure assignment with structured state-space uncertainty and unmodelled dynamics
K. M. SOBEL, WANGLING YU, J. E. PIOU, J. R. CLOUTIER and R. WILSON 765
Sensitivity of efficiency classifications in the additive model of data envelopment analysis
A. CHARNES, S. HAAG, P. JASKA and J. SEMPLE 789
Optimal pole shifting for discrete multivariable systems
N. S. ROUSAN and M. E. SAWAN 799
Reliability analysis of some duplex disk systems
M. AGARWAL, A. KUMAR and M. MAHAJAN 807
Sensitivity analysis in fractional programming—the tolerance approach
D. DUTTA, J. R. RAO and R. N. TIWARI 823
State-space approach to non-linear model reference adaptive control
A. S. C. SINHA, S. KAYALAR and H. O. YURTSEVEN 833

NUMBER 6

Hybrid suboptimal control of multi-rate multi-loop sampled-data systems
LEANG S. SHIEH, GWANGCHYWAN CHEN and J. S. H. TSAI 839
Qualitative multi-model control using a learning approach
G. NAGIB, W. GHARIEB and Z. BINDER 855
Tracking a manoeuvring target using input estimation at high measurement frequency
JIIN-AN GUU and CHE-HO WEI 871
Expert system for selection of phase equilibrium models
CHENG-LIANG CHEN and JEN-YAO CHANG 885
Multi-objective discounted Markov decision processes with expectation and variance criteria
QIU-SHENG LIU, KATSUHISA OHNO and HIROTAKA NAKAYAMA 903
New results in stability of a class of hereditary linear systems
M. DE LA SEN 915
Transformation of the absolute descriptions of linear and non-linear processes to their incremental forms
R. HABER 935
A state-space approach for model reduction of 2-D systems
A. ZILOUCHIAN and R. L. CARROLL 957
Novel modelling approach based on fuzzy set theory to graded problem diagnosis and its application
CHUN-SHENG FU, SHU-QING WANG and JI-CHENG WANG 975
Recursive identification of multi-variable interconnected systems
J. RAGOT and D. MIELCAREK 987
Permanence for three species with cyclic loop
A. SIKDER and A. B. ROY 1001
Orthogonal estimation algorithm for complex number systems
K. M. TSANG and S. A. BILLINGS 1011

NUMBER 7

Orthogonal least-squares parameter estimation algorithms for non-linear stochastic systems
S. A. Billings and G. N. Jones 1019
Spatially recursive algorithms for adaptive estimation of two-dimensional non-causal and non-stationary simultaneous autoregressive model parameters
Ping-Ya Zhao and Dao-Rong Yu 1033
Semi-infinite relaxation of joint chance constraints in chance-constrained programming. Part 1: Zero-order stochastic decision rules
A. Charnes, Y. C. Chang and J. Semple 1051
Non-linear inferential control of packed-bed reactors
Chun-Yu Chen and Chang-Chuen Sun 1063
Universal maps for binary preference structure generating decision principle functors
Kyoichi Kijima and Kenji Tanaka 1083
Tracking control of non-linear stochastic systems by using path cross-entropy and Fokker–Planck equation
G. Jumarie 1101
Load sharing in soft real-time distributed systems
P. K. Srimani and R. L. N. Reddy 1115
Qualitative evaluation of production systems
A. El Mhamedi, Z. Binder and R. P. Bodin 1131
Socio-technical design and evaluation of production systems
A. El Mhamedi and Z. Binder 1141
Digital simulation of system theoretic algorithms applied to image compression
S. Bhama and H. Singh 1155
Non-linearity detection of weakly non-linear dynamic systems using cumulants
K. A. F. Moustafa and H. E. Emara-Shabaik 1167
Control design based on a linear state function observer
Tzu-Jeng Su and R. R. Craig, Jr 1179
Minimum energy control of linear time-invariant systems with input derivatives
S. L. Harris, E. Y. Ibrahim, V. Lovass-Nagy and R. J. Schilling 1191
Analysis of continuous time-varying non-linear systems using block-pulse expansions
S. V. Lapin and N. D. Egupov 1201
Determinant and statistical analysis of linear time-varying systems via block-pulse functions
N. D. Egupov and S. V. Lapin 1213
A bi-criterion algorithm for minimizing machine interference and reducing job waiting time
C. P. Koulamas 1229
Decentralized smoothing algorithms of continuous-time systems in distributed-sensor networks
Jian-Hua Zhang and Guan-Zhong Dai 1237

NUMBER 8

Optimal control of a class of non-linear evolution equations
D. Kravvaritis and N. S. Papageorgiou 1245
Approximation of nonlinear functionals via general orthogonal polynomials and application to control problems
Jianqi Wang and Shienyu Wang 1261

Stochastic modelling of *k*-out-of-*n* units family of systems
B. S. DHILLON 1277
Optimal Hankel-norm approximation approach to model reduction of large-scale Markov chains
GUANRONG CHEN, C. K. CHUI and YAOQI YU 1289
Optimal maintenance policies with lead times and repair
NAOTO KAIO, TADASHI DOHI and SHUNJI OSAKI 1299
Output regulator problem of a nuclear reactor system
YUJI NIWA and HIROYUKI UKAI 1309
Representative sample of LISP program inference from examples
NOBUHIRO INUZUKA, KENICHI TAKAHASHI and NAOHIRO ISHII 1321
New necessary conditions for optimality of singular controls in optimal control problems
KOICHI MIZUKAMI and HANSHENG WU 1335
Multi-rate self-tuning predictive controller for multi-variable systems
R. SCATTOLINI 1347
Continuous-time system modelling using the weighted-parabola-overlapping numerical integration method
ZHIZHONG WANG and DAGAN FENG 1361
Robust stability of diamond families of polynomials with complex coefficients
LONG WANG and LIN HUANG 1371
Double-loop-iterative-tracking-algorithm-based direct coordination for hierarchical steady-state control of interconnected systems
A. SIDAOUI, Z. BINDER and R. PERRET 1379
Genetic design of linear multivariable feedback control systems using eigenstructure assignment
B. PORTER and M. BORAIRI 1387
Erratum 1391

NUMBER 9

Digital iterative learning control of linear multivariable plants
B. PORTER and S. S. MOHAMED 1393
Discrete events and general systems theory
P. KOZÁK 1403
On feedback controllers
P. KOZÁK 1423
Relocation problems of maximizing new capacities under a common due date
MIAO-TSONG LIN and SHIAN-SHYONG TSENG 1433
An edge-based approach for the segmentation of 3-D range images of small industrial-like objects
TAKIO KURITA and N. N. ABDELMALEK 1449
Simple observer-based control law for time lag systems
A. TORNAMBÈ 1463
High-gain observers for non-linear systems
A. TORNAMBÈ 1475
Generalized fixed-interval smoothers for discrete-time systems
KEIGO WATANABE and S. G. TZAFESTAS 1491
Zeros and design of control systems for distributed parameter systems
TOSHIHIRO KOBAYASHI 1507
System dynamics simulation of Hopfield neural networks
S. KUMAR and P. S. SATSANGI 1517

Adaptive controller for minimum phase multi-input multi-output systems
A. Z. Badr 1527
A prediction-error estimation algorithm for the reconstruction of linear and nonlinear continuous time models from frequency response data
K. M. Tsang and S. A. Billings 1533

NUMBER 10

Learning rates in the digital iterative learning control of linear multivariable plants
B. Porter and S. S. Mohamed 1539
A disturbance rejection self-tuning controller for a class of MIMO non-minimum phase systems
X. Li and C. R. Baird 1549
The least squares Padé method for model reduction
L. A. Aguirre 1559
Modelling and control of non-slender flexible robot links
Wang Guo-Li and Lu Gui-Zhang 1571
Identification of multi-class linear and nonlinear systems
K. M. Tsang and S. A. Billings 1603
Performance modelling of an integrated assembly line system with inspection stations and finite capacity local storages; an approximation algorithm
B. Pourbabai 1637
Model-following control of linear proper non-minimum-phase systems
Tzuu-Hseng S. Li, Chiu-Pin Cheng and York-Yih Sun 1657
Relations between the stabilization properties of two classes of hereditary linear systems with commensurate delays
M. de la Sen 1667
Optimal release time on a stochastic single machine
Ching-Jong Liao 1693
Supervisory control for co-ordination of multiple robots
D. P. Garg 1703
Robust stability of discrete multivariable systems subject to non-linear time-varying unmodelled dynamics
Feng-Hsiag Hsiao 1717
A class of differential game problems for descriptor systems
Hansheng Wu 1731
Model reduction using impulse-response gramians: a frequency-domain approach
V. Sreeram and P. Goddard 1745
Deadtime compensation for nonlinear processes with disturbances
Hsiao-Ping Huang and Gow-Bin Wang 1761
Controllability of predicates and languages in discrete-event systems
Toshimitsu Ushio 1777
Recursive state and parameter estimation of linear multivariable singular systems
M. Boutayeb and M. Darouach 1785

NUMBER 11

Digital iterative learning control of compensated linear multivariable plants
B. Porter and S. S. Mohamed 1793
Factorization of *m*-D polynomials in linear *m*-D factors
N. E. Mastorakis, N. J. Theodorou and S. G. Tzafestas 1805

An integrated identification methodology for control and identification
HONG Y. XU, C. R. BAIRD and D. RIORDAN 1825
Robust decentralized model reference adaptive control of discrete-time interconnected systems
M. KAMOUN, A. TITLI and M. B. A. KAMOUN 1841
Distributed filtering
A. FELIACHI 1857
Exact determination of a Lyapunov function and the asymptotic stability domain
L. T. GRUJIĆ 1871
System approach to a generic software specification for flexible manufacturing system job flow management
M. P. FANTI, B. MAIONE, G. PISCITELLI and B. TURCHIANO 1889
On object background classification
N. R. PAL and D. BHANDARI 1903
Recursive computational algorithms for a set of block pulse operational matrices
Z. H. JIANG and W. SCHAUFELBERGER 1921
Robust observer design for nonlinear uncertain systems with LQ regulators
I-KONG FONG, SHUH-CHUAN TSAY and TE-SON KUO 1937
Tracking control of linear time-invariant descriptor systems
R. J. SCHILLING, S. L. HARRIS and V. LOVASS-NAGY 1953
Class of globally stable saturated state feedback regulators
S. TARBOURIECH and C. BURGAT 1965
Power generation scheduling by neural network
KENICHI AOKI, MASAKAZU KANEZASHI, MASARU ITOH and HARUKI MATSUURA 1977
Sliding mode control and a variable structure system observer as a dual problem for systems with non-linear uncertainties
KEIGO WATANABE, TOSHIO FUKUDA and S. G. TZAFESTAS 1991
Asymptotic normality analysis of the estimation error of steady-state models for industrial processes: (SISO) case
Q. X. CHEN and B. W. WAN 2003
Parallel fault simulation on a multiprocessor
U. K. BHATTACHARYYA, G. MOHAN and I. SEN GUPTA 2025
Output feedback uniform decoupling problem of linear time-varying analytic systems
P. N. PARASKEVOPOULOS and K. G. ARVANITIS 2037
Conversion of discrete-time time-invariant linear systems into continuous systems
MORISHIGE KIMURA 2063
Feedforward technique in rendezvous problems for *n* identical simple-integral plants
H. UNBEHAUEN and I. VAKILZADEH 2091
Systems of random mappings with a common fixed point
M. KAM, WEI CHANG and C. RORRES 2113
Erratum 2121

NUMBER 12

Editorial 2123
Development of linear quadratic control laws via control parametrization
M. L. NAGURKA and V. YEN 2125
Optimal feedback control of non-linear systems
N. J. KRIKELIS and K. I. KIRIAKIDIS 2141

Electromechanical modelling of overhead cranes
A. M. EBEID, K. A. F. MOUSTAFA and H. E. EMARA-SHABAIK 2155
Neural network for system identification
YAW-TERNG SU and YUH-TAY SHEEN 2171
Sensitivity analysis of stochastic dynamical systems
MASATO KODA 2187
Generalized realizations with a special coordinate for matrix fraction descriptions
J. S. H. TSAI and WEIN SHUNG CHEN 2197
Mean controllers for discrete systems
G. P. LIU 2219
Relative sampling efficiencies in complex system simulation
J. L. RIGGS and S. B. BROWN 2231
Imperfect debugging models with fault introduction rate for software reliability assessment
SHIGERU YAMADA, KOICHI TOKUNO and SHUNJI OSAKI 2241
Minimax control of maximal monotone differential inclusions in $\mathbb{R}^N$
N. S. PAPAGEORGIOU 2253
On the control of a two-dimensional multi-link inverted pendulum: the form of the dynamic equations from choice of co-ordinate system
P. J. LARCOMBE 2265
On the control of a two-dimensional uniform multi-link inverted pendulum: the enumeration and identification of equilibrium states
P. J. LARCOMBE and B. TORSNEY 2291
The digital optimal regulator and tracker for stochastic time-varying systems
L. G. VAN WILLIGENBURG and W. L. DE KONING 2309
Design of recursive fixed-point smoother using covariance information in linear discrete-time systems
SEIICHI NAKAMORI 2323
Reliability analysis on the multiple-loop network
C. S. YANG 2335
Some remarks on controllability and observability of a flexible beam model
TOSHIHIRO KOBAYASHI 2349
Zeros and controllability of distributed parameter systems
TOSHIHIRO KOBAYASHI 2359
Frequency domain conditions of controllability and observability for a distributed parameter system with unbounded control and observation
TOSHIHIRO KOBAYASHI 2369
A study of hybrid prediction models and their application in economic and social systems
BINGLIN ZHONG and J. A. BRANDON 2377
Digital controller design for systems with transport lag
J. PAL, S. K. NAGAR and J. D. SHARMA 2385
A 0–1 linear programming formulation for solving an equipment replacement problem
C. R. BECTOR, O. HAWALESHKA and A. GILL 2393
Non-archimedean infinitesimals, transcendentals and categorical inputs in linear programming and data development analysis
A. CHARNES, J. J. ROUSSEAU and J. H. SEMPLE 2401
Optimal control of a manufacturing system which consists of three assembly machines
Y. YAVIN and C. FRANGOS 2407
Reduced-order Wiener filter
P. HIPPE and H. SCHLITT 2413
Subject Index 2419
Author Index (with titles) 2427
